Background Medical innovation in America today calls for new collaboration models that span government, academia, industry and disease philanthropy. Global Approach in Safety Testing. AnalyticalChemistryforAssessingMedicationAdherence. Human Proof of Concept. The definitive introduction to how a pharmaceutical company goes about its business of discovering and developing drugs. AcceptableinvivoPKandtoxicity.Barriers to translation and ultimate commercialization will be lowered by bringing best practices from industry into academic settings, and not only by training a new generation of 'translational' scientists prepared to move a therapeutic idea forward into proof of concept in humans, but also by developing a new cadre of investigators skilled in regulatory science. Solid overview of all the steps from lab bench to market in an easy-to-understand way which will be accessible to non-specialists.
