That's because shooting parameters can vary widely due to stage lighting, and you dont want to get caught using ISO when you could have gotten away with I'm not sure if it has been advised in the comments, but I think one of the most important tips is to use spot metering, as the light changes so often and will blow out your subject more times than not if not using spot. The second one was the key with a young group, from repetitions to concerts, eventually doing their first CD Cover!
