Impelled by a demand for increasing American strength in the new global economy, many educators, public officials, business leaders, and parents argue that school computers and Internet access will improve academic learning and prepare students for an information-based workplace. More attention, Cuban says, needs to be paid to the civic and social goals of schooling, goals that make the question of how many computers are in classrooms trivial. Andonours,too! Visit our multimedia page for video about recent projects and interviews with HUP authors. In his studies of early childhood, high school, and university classrooms in Silicon Valley, Larry Cuban found that students and teachers use the new technologies far less in the classroom than they do at home, and that teachers who use computers for instruction do so infrequently and

unimaginatively. But just how valid is this argument?
It was found that a majority of college professors, and nearly 90 percent of
rated it liked it Jul 19,
