The Elements of Scrum Kindle ed. Retrieved 14 June This is disputed by proponents of agile software development, who state that developers Agile Software Construction write documentation if that is the best way to achieve the relevant goals, but that there are often better ways to achieve those goals than writing static documentation.

Iterative product development allows the software to evolve in response to user feedback. If team members are assigned tasks by others or too early in the Agile Software Construction process, the benefits of localized and timely decision making can be lost. Agile management also offers a simple framework promoting communication and reflection on past work amongst team members. After the users know the real value of the updated piece of software, they can make better decisions about the software's future. Take This 42 Point Test". An adaptive team cannot report exactly what tasks they will do next week, but only which features they plan for next month.
