Loss of sea ice cover will have large-scale ecological effects, especially on sea ice-dependent organisms, such as bowhead whales, narwhales, polar bears, several species of seals, to name a few AMAP These reports have emphasized new information that has been gathered since Theplanworkhasbeencarriedoutincooperationbetweenscientificinstitu The planning as well as the implementation of the management plans is a top-down process, led by an inter-ministerial steering group led by the Ministry of Environment, with participation from the ministries of Fisheries and Coastal Affairs, Energy and Petroleum and Foreign Affairs. A second area where management plans can be further developed is by inclusion of economic considerations. Therelationshipbetweentheoceans,internationalODAandsustainabledev management plans are zoning plans in the sense that they limit the type of petroleum-related activities that can take place in space and time.
